

RiaFresh

Verduras da Ria Formosa

*Vegetables from Ria Formosa

Ice Plant from Ria Formosa *Ice Plant from Algarve*

Ice Plant

Mesembryanthemum crystallinum

Herbaceous plant that stands out for being densely covered with large crystalline capsules. It is also known as ice plant. Glacial phytoid leaves from 1 cm to 3 cm are rounded at the apex and have wavy edges.

Ice Plant RiaFresh® is visually very attractive, the taste is intense, crisp, releasing a large amount of water with a marine brake. It brings to the dishes a very refreshing element, so it is preferable to use in cold dishes.

Ice Plant Riafresh® is a result of a choice from the best species from Ria Formosa Natural Park, Algarve, and it is produced in a controlled environment. It possesses a consistent and exceptional quality.
